

Model HD

Two-Way Snow Plow

The HD is a heavy duty plow designed for highway use and features a compound curve on top of the moldboard for improved snow throwing ability. The moldboard is manufactured from rolled 10ga AR500 steel, and supported by 8 1/2" x 3" vertical ribs, 5 hinge points, dual external coil trip springs, and greasable 1-3/4" main pivot pin. This plow has a replaceable bolt-on 1/2" 4"x4" blade wear-angle for easy maintenance. Like all Good Roads plows, it is also Zinc primed for maximum corrosion protection.
