

# Model 112

## Two-Way Snow Plow

Small and light, this plow throws snow in either direction. It's ideal for getting into and clearing small, congested areas with ease. It features six 1/2" x 3" vertical ribs, 3 hinge points, and 60" outside hinge centers. The 112 is ideal for light/medium duty applications.

*All Good Roads moldboards are constructed of HSLA A1011 Grade 50 10 ga. steel or better.*

Model Number	112-930	112-936
Moldboard Length	9'	9'
Moldboard Height	30"	36"
Cutting Width (28°)	7'11"	7'11"
Cutting Width (35°)	7'5"	7'5"
Cutting Width (42°)	6'10"	6'10"
Approximate Weight	775	870

# Model 112M

## Two-Way Snow Plow

Like the Model 112 but with a compound curve on top of the moldboard. More curvature provides more confinement of the snow until it's thrown off the side of the moldboard. The 112M features six 1/2" x 3" vertical ribs, 3 hinge points, and 60" outside hinge centers.

*Every Good Roads plow is equipped with a standard enclosed trip mechanism.*

Shown with optional power angle locking (PAL) attachment
